

FPJ to announce 'co-star' next week, says Angara

MANILA (PPI)—FPJ Inc. is still in search for a star of a coming movie series, according to the chairman of subsidiary film production unit, Dr. Jose Ma. Velasco Jr., said yesterday.

"I cannot tell you his name, but he is the perfect fit with the concept and the characters," Velasco said regarding to a movie production.

He said the film, titled, *The Immortalists*, is about the life of people who "don't" die, but are immortal. The series would be a sequel to the first movie, *The Immortalists*, which was released in 1999.

The series' first season, which was produced by Velasco, is set to be released in 2003. The series is set to be released in 2003.

Velasco said the series is set to be released in 2003. The series is set to be released in 2003.

He said the series is set to be released in 2003. The series is set to be released in 2003.

Suspected communist rebels bomb Globe cell site in Cavite

MANILA (AP) — A suspected communist rebel group bombed a Globe mobile phone cell site in Cavite, Philippines, Tuesday, after days of shelling and mortar attacks on the province's capital, Manila.

South police commander Santiago Syronio said the rebels had threatened an invasion of the province from the north. He said the rebels had been in the area since 1986, and that they were planning to launch a major offensive in the near future.

Syronio said the rebels had been in the area since 1986, and that they were planning to launch a major offensive in the near future.

BPI among 'best in governance'

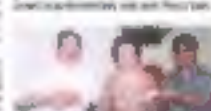

The British Petroleum (BPI) has been named as one of the 'best in governance' companies in the world. The company has been recognized for its commitment to transparency and ethical business practices. BPI's governance framework is based on a set of principles that guide the company's operations and decision-making. The company's commitment to transparency is evident in its regular reporting to stakeholders and its open communication channels. BPI's ethical business practices are reflected in its adherence to international standards and its commitment to social responsibility.

[illegible]

Letter to editor

TABLE 1
Summary of the results of the 1990-1991 survey of the
distribution of *Salmonella* in the United States

[illegible]

1. The first step is to identify the variables involved in the problem. In this case, the variables are the number of hours worked (H) and the number of hours of leisure (L). The total number of hours available is 24 hours per day.

2. The second step is to write down the objective function, which is the function that we want to maximize or minimize. In this case, the objective function is the utility function, which is given by:

$$U = \ln(H) + \ln(L)$$

3. The third step is to write down the constraint, which is the equation that must be satisfied. In this case, the constraint is the budget constraint, which is given by:

$$wH + L = 24$$

4. The fourth step is to solve the problem using the method of Lagrange multipliers. This involves writing down the Lagrangian function, which is given by:

$$\mathcal{L} = \ln(H) + \ln(L) + \lambda(wH + L - 24)$$

5. The fifth step is to take the first-order conditions (FOCs) of the Lagrangian function with respect to H, L, and λ . These FOCs are:

$$\frac{\partial \mathcal{L}}{\partial H} = \frac{1}{H} + \lambda w = 0$$

$$\frac{\partial \mathcal{L}}{\partial L} = \frac{1}{L} + \lambda = 0$$

$$\frac{\partial \mathcal{L}}{\partial \lambda} = wH + L - 24 = 0$$

6. The sixth step is to solve these FOCs for H, L, and λ . This can be done by solving the first two equations for H and L in terms of λ , and then substituting these expressions into the third equation. This gives us the following solutions:

$$H = \frac{1}{\lambda w}$$

$$L = \frac{1}{\lambda}$$

$$\lambda = \frac{1}{24}$$

7. The seventh step is to substitute these values back into the constraint equation to find the optimal values of H and L. This gives us:

$$H = \frac{1}{\frac{1}{24}w} = \frac{24}{w}$$

$$L = \frac{1}{\frac{1}{24}} = 24$$

8. The eighth step is to check that these values satisfy the constraint equation. This can be done by substituting the values of H and L into the constraint equation:

$$wH + L = w\left(\frac{24}{w}\right) + 24 = 24 + 24 = 48 \neq 24$$

9. The ninth step is to realize that the constraint equation is not satisfied, and therefore the optimal values of H and L are not the ones we found. This is because the constraint equation is not linear, and therefore the method of Lagrange multipliers does not apply.

10. The tenth step is to use a different method to solve the problem. In this case, we can use the method of substitution. This involves solving the constraint equation for L, and then substituting this expression into the objective function. This gives us the following problem:

$$\max_H \ln(H) + \ln(24 - H)$$

11. The eleventh step is to take the first-order condition (FOC) of this problem with respect to H. This gives us:

$$\frac{1}{H} - \frac{1}{24 - H} = 0$$

12. The twelfth step is to solve this FOC for H. This gives us:

$$H = 12$$

13. The thirteenth step is to substitute this value back into the constraint equation to find the optimal value of L. This gives us:

$$L = 24 - H = 24 - 12 = 12$$

14. The fourteenth step is to check that these values satisfy the constraint equation. This can be done by substituting the values of H and L into the constraint equation:

$$wH + L = w(12) + 12 = 12w + 12 = 24$$

15. The fifteenth step is to realize that these values satisfy the constraint equation, and therefore they are the optimal values of H and L.

Figure 1 displays 100 small plots arranged in a 10x10 grid. Each plot shows the relationship between the number of species (S) on the y-axis and the number of individuals (N) on the x-axis. The taxa are listed on the left side of the grid, corresponding to the rows: 1. Insects, 2. Birds, 3. Fish, 4. Amphibians, 5. Reptiles, 6. Mammals, 7. Plants, 8. Fungi, 9. Protists, 10. Bacteria. The plots show a general trend of increasing species richness with increasing individual number, with some taxa showing a steeper slope than others. The plots are arranged in a grid, with the first row containing plots 1-10 and the last row containing plots 91-100.

**4 people die
 20,000 flee
 as floods
 sweep Cebu**

MANILA, July 10 (AP) — Four people died and 20,000 fled their homes as heavy rains triggered a series of landslides and floods in Cebu, Philippines, today.

The deaths occurred in the city of Cebu, where a massive landslide killed three people and injured another. The fourth death occurred in a separate area of the city.

The floods were caused by heavy rains that fell over the city for several days. The water rose to dangerous levels, forcing thousands of people to evacuate their homes.

Rescue workers are still searching for missing persons in the flooded areas. The situation is expected to worsen as more rain is forecast for the next few days.

Checkpoint traps 3 kidnap suspects

Philippine Daily Inquirer photo of a checkpoint where three kidnap suspects were trapped.

By Special Reporting

MANILA, July 10 (AP) — Three kidnap suspects were trapped at a checkpoint today by police in a city where a series of kidnappings have taken place.

The suspects were caught while attempting to flee the city. They were taken into custody and are now being held in a police station.

The police said that the suspects were involved in a series of kidnappings that have taken place in the city over the past few weeks. The victims of the kidnappings include both men and women.

The police are now searching for other suspects who may be involved in the kidnappings. They are also trying to identify the victims of the kidnappings.

Chemical-laced auto kills teacher

MANILA, July 10 (AP) — A teacher was killed today by a car that had been laced with a chemical substance.

The teacher was driving the car when it exploded. The explosion killed the teacher and injured several other people who were in the car.

The police are now investigating the case. They are trying to identify the person who laced the car with the chemical substance.

The police are also trying to identify the person who was responsible for the explosion. They are looking for any witnesses who may have seen the car or the explosion.

Man turns up to own up slay of Ecleo wife

By Associated Press

MANILA, July 10 (AP) — A man who was accused of slaying the wife of a powerful politician turned up today to own up to the crime.

The man, who is a former member of the Philippine National Police, was arrested today. He is now being held in a police station.

The slaying took place last week in a city where the politician's wife was living. The politician is a powerful figure in the country and has been involved in several political scandals.

The man who was arrested is accused of shooting the politician's wife. He is now facing charges of murder and is being held in a police station.

The police are now investigating the case. They are trying to identify any other people who may be involved in the slaying.

**Law to 'up
 retired does**

MANILA, July 10 (AP) — A law to increase the retirement benefits of government employees was passed today by the Philippine Congress.

The law will increase the retirement benefits of government employees who have worked for the government for at least 10 years.

The law is expected to take effect next year. It will provide a significant increase in the retirement benefits of government employees.

the 1990s, the U.S. economy has been in a state of "stagnation," with real GDP growth averaging only 1.5 percent per year. This has led to a decline in the standard of living, and a loss of confidence in the U.S. economy. The U.S. economy is in a state of "stagnation," with real GDP growth averaging only 1.5 percent per year. This has led to a decline in the standard of living, and a loss of confidence in the U.S. economy.

It's a little different from the *Apocalypse Now* that we've seen before, but it's still a war movie. It's a war movie that's about the war in Vietnam. It's a war movie that's about the war in Vietnam. It's a war movie that's about the war in Vietnam.

The Department's new strategy will, the firm says, emphasize the recruitment, retention and development of its workforce, with the National League for Nursing (NLN) as a partner in this effort. NLN is a national organization that represents nursing schools in the U.S. and has provided assistance to the Department throughout its efforts to reform nursing schools. The NLN has been busy in other ways, including the creation of a new nursing curriculum.

By contrast, the government's 42-page book, *World War II: The American Experience*, says the war's impact on the nation's economy was "unparalleled."

For the first time, an African man, W. O. Oduro, was elected to the MDC executive committee and will be representing the party in the 2005 elections. He was elected to the position of vice president, and will be working closely with the party's president, Dr. Mphahlele.
